PRODUCER DECLARATION

We hereby certify that our product

PVC Floor covering ELEKTROSTATIK

is convenient to Resistance to loads

Powered pallet truck and forklifts: total weight up to 2.5 t with hard wheels
and up to 5 t with air tyres.

Static loads: 50 kg/cm² - dynamic loads: 90 kg/cm²

Elektrostatik have been tested according EN 424 – determination of the simulated movement of the furniture leg (dimension of the leg- 100kg), EN 425 – castor chair test and abrasion resistance EN 660-2 Group T.

This Declaration is issued by customer's request.

Mentioned values are only for PVC floor covering and total Resistance to loads of floor depends on many factors (used background material, composition of the floor, etc.)
